**JOURNAL DE GÉNÉTIQUE HUMAINE**

The "Journal de Génétique humaine" is the first journal in French devoted to human genetics. It is addressed to all physicians, biologists, anthropologists and others, who might be interested in problems relating to the study of heredity in man.

The committee of editors is composed of three leading physicians and geneticists, Professor A. Franceschetti, director of the Ophthalmological Clinic, Geneva; Professor L. van Bogaert, director of the Neuro-Pathological Department of the Institute Bunge, Antwerp; and Maurice Lamy, professor of human genetics at the Medical Faculty, Paris. In addition, the committee of editors is assured the collaboration of a large number of scientists from many countries. The publication of the journal is assumed by the Institute of Medical Genetics at the University Ophthalmological Clinic, Geneva.

The journal will appear four times a year.

Price of the volume $7.00; of a separate number $2.00 payable by check or money order to
